when an independent activist and her office temp with a doctorate buddy embark on a quest for a chocolate bar a bar that serves not alcohol but chocolate in all its deliciously decadent forms they pick up a hitchhiking extraterrestrial who s stopped on earth to ask for directions i know right they do their damndest to help x find the information she needs to get back home all the while confronting everyday sexism rather like bashing your head against a jellyfish and committing assorted outrageous acts and everyday rebellions

based on a true story a man s encounter with an extraterrestrial being breaks down the illusions of life and the institutions that govern such illusions such as religion science and governmental sovereignty the information is eye and mind opening and filled with the realities that intelligent life on earth is simply one planet out of billions that exist in the milky way galaxy which is teeming with similar and much more exotic super being type life forms the earth is not flat it is not the center of the universe and certainly is not unique in any way shape or form

witty and thought provoking two vatican astronomers shed provocative light on some of the strange places where religion and science meet imagine if a martian showed up all big ears and big nose like a child s drawing and he asked to be baptized how would you react pope francis may 2014 pope francis posed that question without insisting on an answer to provoke deeper reflection about inclusiveness and diversity in the church but it s not the first time that question has been asked brother guy consolmagno and father paul mueller hear questions like that all the time they re scientists at the vatican observatory the official astronomical research institute of the catholic church in would you baptize an extraterrestrial they explore a variety of questions at the crossroads of faith and reason how do you reconcile the the big bang with genesis was the star of bethlehem just a pious religious story or an actual description of astronomical events what really went down between galileo and the catholic church and why do the effects of that confrontation still reverberate to this day will the universe come to an end and could you really baptize an extraterrestrial with disarming humor brother guy and father paul explore these questions and more over the course of six days of dialogue would you baptize an extraterrestrial will make you laugh make you think and make you reflect more deeply on science faith and the nature of the universe

in both literature and film mutants androids and aliens have long functioned as humanity s other nonhuman bodies serving as surrogates to explore humanity s prejudice bigotry and hatred scholars working in fields of feminism ethnic studies queer studies and disability studies among others have deconstructed representations of the othered body and the ways these fictional depictions provide insight into the contested terrains of identity subjectivity and personhood in science fiction more broadly and the superhero genre in particular the fictional other often a superhero or a villain is juxtaposed against the normal human and such others have long been the subject of academic investigation author james a tyner shifts this scholarly focus to consider the ordinary humans who ally with or oppose othered superheroes law enforcement officers military officials politicians and the countless nameless civilians are all examples of humans who try to make sense of a rapidly changing more than human and other than human universe the resulting volume mutants androids and aliens on being human in the marvel cinematic universe provides a critical posthumanist reading of being human in the marvel cinematic universe mcu centering the mcu s secondary human characters including matthew ellis ellen nadeer rosalind price as well as jimmy woo sadie deever holden radcliffe and others tyner considers how these characters attempt to monitor incarcerate or exterminate those beings considered unnatural and thus threatening placing into conversation posthumanism environmental ethics and myriad philosophical and biological ontologies of life and death tyner maintains that the superhero genre reflects the current complexities of meaningful life and of what happens in society when the human is no longer the unquestioned normative standard

in this comprehensive and interdisciplinary volume former nasa chief historian steven dick reflects on the exploration of space astrobiology and its implications cosmic evolution astronomical institutions discovering and classifying the cosmos and the philosophy of astronomy the unifying theme of the book is the connection between cosmos and culture or what carl sagan many years ago called the cosmic connection as both an astronomer and historian of science dr dick has been both a witness to and a participant in many of the astronomical events of the last half century this collection of papers presents his reflections over the last forty years in a way accessible to historians philosophers and scientists alike from the search for alien life to ongoing space exploration efforts

this volume was first published by inter disciplinary press in 2016 zygmunt bauman in his publication liquid modernity described the meeting of strangers as a mismeeting a brief encounter which had no past and the unlikely possibility of a future this suggests a meeting which is free from expectation but it also has the potential to fuel alienation and displacement being a stranger is not synonymous with distant geographies or borderlands though it does include them strangers and peculiar places can be found closer to home themes of alienation strangeness and foreignness converge in the following accounts the reader will migrate through unrecognisable narratives coming into contact with diasporic identities stand up comedians english language educators artists and photographers to mention a few these accounts are diverse but commonalities are tangled between webs of thought readers are invited to tug at the threads of this web to find their own connections and chance upon unexpected revelations which come through picking the ends

understanding the nature of consciousness is the key to understanding the whole of reality it is not that mind has emerged from matter but rather that consciousness and matter are dual aspects of a much greater reality beyond the simplistic notion of duality that is so entrenched in western philosophies there is a deeper and more profound way to comprehend the nature of our existence we are parts within a wider whole we do not exist as separate beings within the universe we are parts of the universe itself the theory outlined in consciousness and evolution turns orthodox explanations for the evolution of mind upside down it is not matter that has created consciousness but rather it is consciousness that has moulded matter and created intelligent beings like ourselves in order to

understand why we are here and to live our lives as fully as we might we must seek to address the issue at the very core of our being the existence of mind itself
